

Budget Hearing Information
Division of Health Administration

Overall

1. Our focus areas include healthcare, leadership, and urban initiatives. All faculty in the division are involved in all of our major focus areas. Our thrust as a program is to prepare individuals for entry-level leadership positions in healthcare organizations, primarily hospitals due to their dominance in our market.

2. Under the University's areas of focus, our program and faculty fit leadership, healthcare programs and urban initiatives. We have also started a new partnership with Wright Medical Technology so should soon have more involvement in biotechnologies. From a college perspective we fit in health-related studies, and once again, may be expanding into the biotechnology area.
